Subject: Application for Frontend Trainee Position

Dear Hiring Manager,

I'm excited to apply for the **Frontend Trainee** position at IMS Software Pvt. Ltd. I'm currently a BCA student at Academia International College, and I'm passionate about building clean, responsive websites that give users a great experience.

Recently, I worked on a project called **BlogWave**, a full-featured blogging platform. I focused on the frontend—building responsive layouts and improving the user interface with HTML, CSS, and JavaScript. This project gave me hands-on experience in turning design ideas into working features. I've also worked on a restaurant website using Bootstrap 5 and helped develop an e-commerce site with user authentication and eSewa integration.

I'm familiar with Git and GitHub, and I've started exploring frontend frameworks like **React Basics**, which I'm eager to learn more about. I enjoy writing clean code, solving problems, and learning from others—qualities I hope to bring to your team.

I've attached my resume and would love the opportunity to talk more about how I can contribute and grow at IMS Software. Thank you for your time.

Best regards,

Unique Shrestha
